

# PHOTO PEACH

## CREATE YOUR ACCOUNT

Go to [photopeach.com](http://photopeach.com)

Click **Sign up for Free!**

Enter unique username, email address, and password

## UPLOAD PHOTOS

Click **Upload Photos**

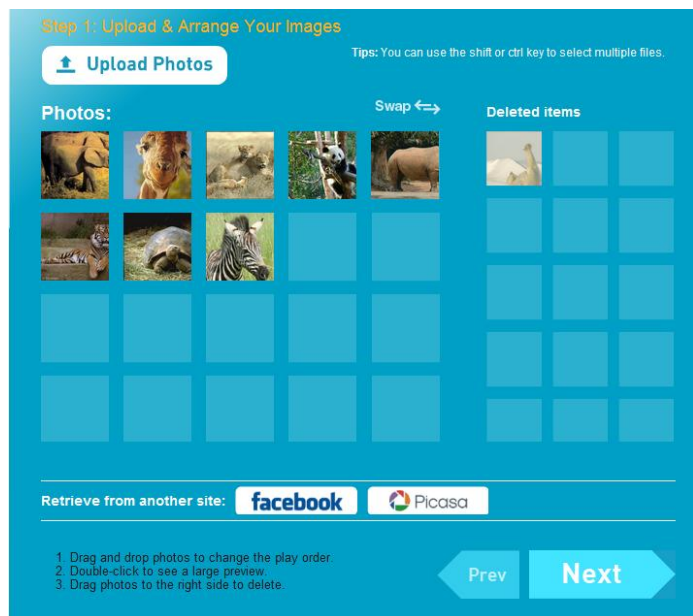

Navigate to the place on your computer where you photos are stored

You can upload multiple photos at one time by selecting all or control-clicking on photos. The free version supports projects with up to 30 photos.

Rearrange photos by dragging the photos into the correct location. If you no longer want to include a photo in your project, drag the photo to the Deleted Items on the right column

Click **Next** at the bottom

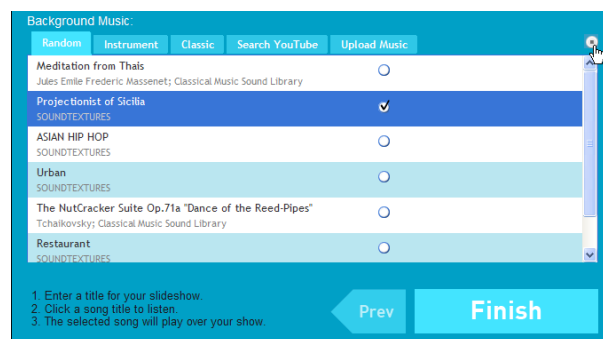

## TITLE, SPEED, MUSIC

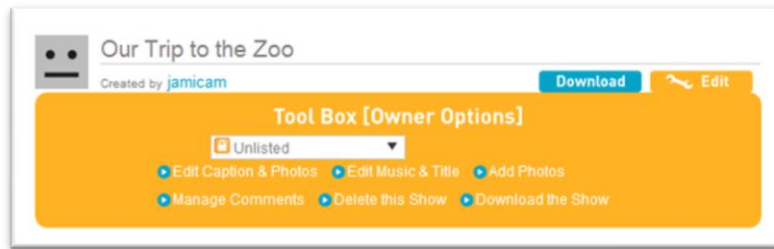

Enter a title for your project and set the transition speed - this is the number of seconds between images

Select background music by clicking the title of the music tracks under the **Random**, **Instrumental**, or **Classic** tabs

The free version also allows the use of music from YouTube but does not allow you to upload your own music.

Click **Finish** and you have created your slide show - well done! Click the **Story** and **Spiral** buttons under your slide show to see different playback options.

## EDIT FOR ADDITIONAL OPTIONS

Click the orange **Edit** button above your slide show preview. Here you will find a variety of options.

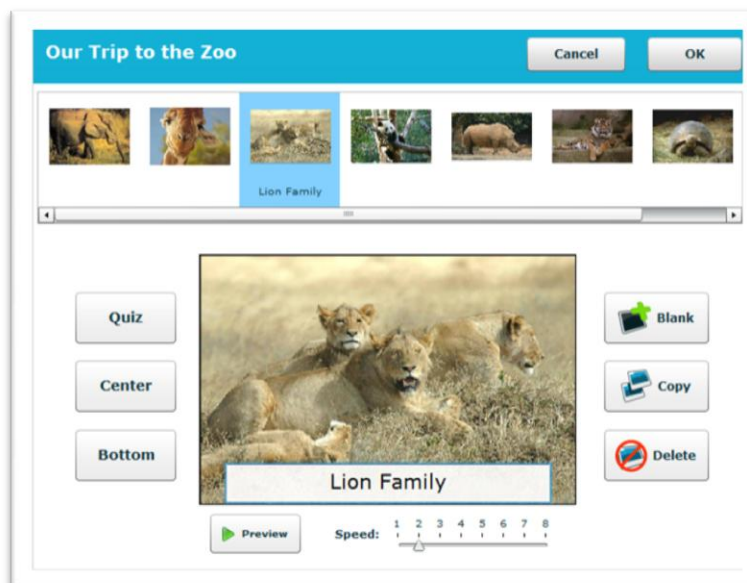

Click **Edit Caption & Photos** to add text to any of your images

Click the photo in the timeline at the top then enter text in the box provided

You can position text at the **Center** or **Bottom** of your photo using the buttons on the left

Add a **Blank** slide by clicking the button on the right

Add a simple multiple-choice question to any photo or blank slide by clicking the **Quiz** button

## EMBED

To embed your slide show in your blog, wiki, or other website, hover over the playback until six little blue buttons appear on the right side

Click the fifth blue box with the pencil image - this will display the embed code

Copy the code for either the story or spiral playback then paste into your blog, wiki, or other site

Note: your slide show must be set to Public before it will allow you to copy the embed code
